FOR IMMEDIATE RELEASE

TCI Software Named "Company of the Year" by *CIOReview* in Annual List of Top Healthcare Solutions Providers

ABERDEEN, N.C. – Feb. 11, 2019 — TCI Software, Inc. was selected as the top company in *CIOReview* magazine's annual list of the nation's 50 most promising healthcare solutions providers.

"TCI Software enables healthcare executives to optimize patient engagement—by capturing patient feedback in real-time as patients leave their clinic appointments, which is just one of the reasons we have selected the company as our Company of the Year for 2019," said Justin Gonsalves, senior editor for *CIOReview*.

"We are honored *CIOReview* has recognized the impact we are making on healthcare technology today," said Tim Maroney, TCI president and CEO. "As hospitals and clinics in the U.S. are under tremendous pressure to improve patient satisfaction and simultaneously reduce costs, TCI's flagship Rounds® software platform provides a low-cost, high-touch and real-time patient feedback program allowing clients to measure and track cost savings realized from fewer ER visits, admissions and re-admissions."

An editorial published in *CIOReview*'s February edition out today cited the TCI's seamless on boarding process and easy-to-deploy 'bundled' solution (containing both the hardware and software) as features setting the company apart from other healthcare solutions providers. The article also highlights TCI's partnership with the National Association of Free Clinics (NAFC) and innovative software features like an editable language translation tool that ensures non-English speaking patient outcomes are not underrepresented in clinic performance reports. Rounds software also allows users to aggregate data across multiple sites and generate reports and charts with a single click.

"We are disrupting the traditional methodology for collecting and analyzing patient survey data by replacing direct mail and email programs with a fully digital solution," Maroney said.

TCI Software, Inc., headquartered in Aberdeen, N.C., is a provider of healthcare software programs that enable hospital and clinic administrators to capture patient satisfaction and quality of care feedback in real-time at the point of service. The Rounds® clinic software application is currently deployed in 85 clinic locations in 14 states.

CIOReview, a technology magazine, has been at the forefront of guiding organizations through the continuously disruptive landscape and providing enterprise solutions to redefine the business goals of enterprises tomorrow.
